Aims and Scope

The *Journal of Computational and Applied Mathematics* publishes original papers of high scientific value in all areas of computational and applied mathematics. The main interest of the Journal is in papers that describe and analyse new computational techniques for solving scientific or engineering problems. In addition, the improved analysis, including the effectiveness and applicability, of existing methods and algorithms, is of importance.

Survey articles dealing with interactions between different fields of applied mathematics are welcome.

A 'Short Communications' has at most five journal pages.

The target audience comprises: applied mathematicians, numerical analysts, computational scientists and engineers.
